

OSC 92UL TL series Digital scale

<Specifications>

- Possible to manufacture in specified sizes
- Obtained model approval in various shapes
- Possible to communicate with various peripheral devices
- All stainless made

Production Example

<Special loading size>

- Special large platform
- Consistently from design and manufacture by our company.
- Possible to meet the demand in 10 mm interval.
- Can cope with sizes not shown in standard items, such as small capacity but large sized platform, large capacity but small platform, etc.

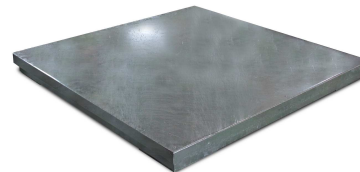

<Weighing apparatus with conveying device>

- Free roller conveyor
- Other than free roller, combining of auto conveying devices such as chain conveyor, slat conveyor are possible.
- Adjusted while devices incorporated, finished highly precisely.
- Proposal for system including automatic conveying control is possible.

<Special material>

- Hot dip galvanizing
- Corresponds special material such as all SUS304 or SUS316, hot dip galvanizing
- Possible to accept modification of paint specifications, such as salt resist paint, etc.
- Also possible to modify the material of load cell main body to stainless steel.

<High precision specifications>

- 1/10000 high precision load cell
- By hiring high precise load cell, display and analysis of 1/10000 becomes possible
